

DISCLAIMER

The information presented in this brochure is subject to change. The information provides a general overview and may not address every development matter. It is intended to be used as a guideline. There are other aspects of the Land Use Bylaw #921/21 that may impact your development.

WHY DO I NEED A DEVELOPMENT PERMIT?

The permit process focuses on making certain that new developments align with the rules and regulations set out in the LUB. The permit process is implemented to ensure the **safety and health** of our community, as well as to aid in creating **meaningful and highly valued spaces**.

All land in Bassano is divided into districts (also referred to as zones), each district has its own set of development rules. The LUB lists these rules, which were established in part to ensure that everyone has an opportunity to seek approval for a development project or to express concerns about a project. A permit confirms that all rules and planning policies have been considered.

Non-Residential Fence

Permit Guide

GUIDELINES

You will **not** be required to obtain a permit for a fence if it meets the permitted use guidelines and standards listed below. If you plan a fence that does not meet these standards, a development permit with a **variance** may be required.

You can: build your fence on your property line, or within your property boundary. If you build the fence within your property boundary, remember that you are responsible to keep the back side of the fenced area clear and free of debris. Fences must not be built on a boulevard.

It is your responsibility to know where your property line is. The Town does not have an in-house survey department and will not mark your property line. If you would like your property lines marked at your own expense contact a surveyor.

BEST PRACTICE

Talk to your neighbours as part of your fence planning process. Consider working together on the project.

CLICK BEFORE YOU DIG

It is your responsibility to “Click before you dig” to safely identify buried utility lines before you begin the installation of your fence.

WHAT IS PERMITTED:

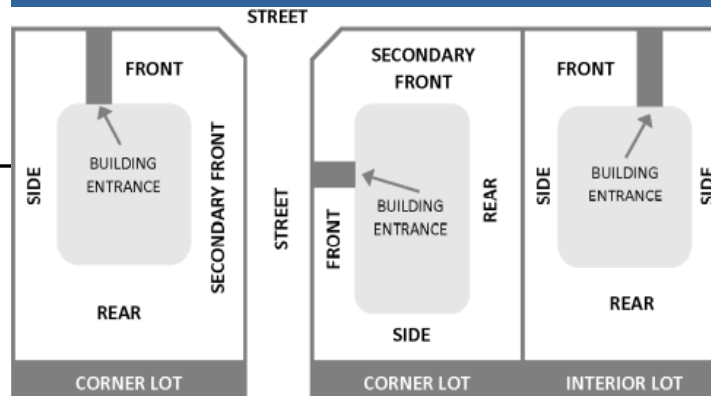

You **DO** need a permit if:

- A fence wall, gate, hedge or any other means of enclosure exceeds 1.8m (6ft) in height within a **front, secondary front, side and rear yards.**

You **do NOT** need a permit if:

- A fence in a **side or rear yard** is 2.4m (8ft) or less. Fences in the **side or rear yard** must not exceed 2.4m (8ft).

WHICH YARDS ARE WHICH?

- Barbed wire below a height of 1.8m (6ft) is not permitted
- Razor wire is not permitted
- When a permit is required the Development Authority may regulate the material types and colors used for the fence.

FENCE REQUIREMENTS

In the Main Street Commercial land use district fences constructed with barbed wire, razor wire, concrete lego blocks, palettes, or any other materials incompatible with a pedestrian orientated main street aesthetic are not allowed.

Fences must not be constructed within any developed or undeveloped roadway or laneway right-of way.

HOW TO APPLY FOR A VARIANCE USE PERMIT

You must complete a permit application and include a detailed one-dimensional site plan of the proposed development. The site plan must include:

- A civic address and north arrow.
- All buildings, structures, and fences (existing and proposed) on the property with their sizes listed.
- The distance between all buildings, structures, and fences from the front, side, and rear of the property lines.
- The proposed location of the fence with dimensions and exterior finish of the fence.
- The variance being sought.
